Telegram Group Manager Bot

- Description: What can this bot do?
I'm Gojo, a powerful group management bot built by @ShreyashRangrej to help you manage your group easily. I can restrict users. I can greet users with customizable welcome messages and even set a group's rules. I have an advanced anti-flood system. I can warn users until they reach max warns, with each predefined actions such as ban, mute, kick, etc. I have a note keeping system, blacklists, and even predetermined replies on certain keywords. I check for admins' permissions before executing any command and more stuffs. Bot licensed under the GNU General Public License v3.0. I'm hosted on Heroku!!
- Language Used: Python (Python Telegram Bot API)
- URL: <https://t.me/MasterGojoBot>
- Source Code:
